BADEN SPORTS, INC. ARTWORK SPECIFICATIONS

NON-VECTOR

VECTOR

VECTOR ARTWORK IS THE PREFERRED METHOD

- **Non-Vector** art has rough edges and artwork is created with a series of boxes(pixels) appears to look blurry when enlarge, not sharp.
File extensions: (.jpg, .doc, .tif, .gif, .bmp)

- **Vector** art has smooth edges and artwork is created with a series of points and lines. (stays smooth no mater how big or small)
File extensions: (.eps, .ai, .fh)

Baden Sports, Inc. requires that artwork be received in an *editable, vector-based format*. This is most often saved in the **original source** of the artwork. If Adobe Illustrator, exten: (.ai) If Freehand (.fh) or saved as/export as editable .eps JPEG, TIFF, BITMAP and MS PAINT formats are not acceptable. **All fonts in your artwork must be converted to paths/outlines.** This helps ensure that your correct font style is used, otherwise the art dept. will replace it as close as possible (but does not guarantee a match)

If vector-based artwork cannot be located then Baden can re-create your logo from a high-resolution JPEG for a small fee. Baden is currently running the following programs and prefers compatible files when creating a custom ball:

Adobe Illustrator CS5 (or previous versions) **Adobe Photoshop CS5** (or previous versions) and also older files in **Macromedia Freehand MX**
